

Michael "Mike" Rojek

IT and Media Coordinator

Mike began his career at UCMI as a member of our Bargain Basket team. Mike still volunteers his time in the Bargain Basket electronics department - researching, repairing, restoring and pricing electronics and media items.

Mike began his professional career as the Sales and Marketing Director for AdRem Software, an enterprise network monitoring software developer in Poland. Mike was responsible for their English-language sales and their entire global marketing presence. Mike is now a freelance digital marketing professional, with a focus on running paid social and search advertising. Mike has worked with other non-profit charities, providing paid social and search ads, as well as providing IT assistance in reporting, troubleshooting, training and web development. Mike is also experienced in managing social platforms and editing videos.

In addition to managing our worship livestream and audio system, Mike is responsible for all of our innovative ministry endeavors involving technology. Mike is also tasked with maintaining our social media and online presence and attending fellowship events as scheduled to digitally capture memories in the making.
